5G: Telcos, phonemakers get deadline till mid-Nov

Apple says upgrade in Dec, Samsung to roll it out mid-Nov

JATIN GROVER
New Delhi, October 12

THE GOVERNMENT ON Wednesday asked the telecom operators as well as handset makers to sort out glitches in 5G services by November 15 so that user experience is seamless and not marred by patchy network coverage or device-related issues.

In a meeting with the telecom operators — Reliance Jio, Bharti Airtel, and Vodafone Idea and all the handset manufacturers like Apple, Samsung, and others, secretary, ministry of electronics and information technology, said that by December, all issues should be sorted out by both the parties.

Both parties have been asked to provide fortnightly updates to the government on the progress of their networks and software upgrades on 5G devices, respectively. "The government is focused only on one goal which is to increase 5G coverage for users and these meetings are necessary to take stock of the situation," an official said.

While Samsung said in a

GETTING 5G-READY

Most other Android device makers have started rolling out the software upgrade and are expected to fully meet Nov 15 deadline

Telcos said they are rolling out services in a phased manner and will continue to do once the handset makers upgrade the software

Sebi's plea against RIL: SC hearing to now be in chambers

INDU BHAN
New Delhi, October 12

THE SUPREME COURT on Wednesday did a U-turn and decided to hear in chambers — and not in open court — the Sebi's petition seeking a review of its August 5 judgment that had directed the market regulator to share certain documents with Reliance Industries (RIL).

The company claims these records will exonerate it and its promoters from criminal prosecution initiated in a case related to the alleged irregularities in the acquisition of its shares between 1994 and 2000.

While the case was listed for hearing on Wednesday in the open court at 3.55 pm, it was not taken up. However, a short order was later uploaded on the court's website stating that Sebi's application for seeking an open court hearing is rejected.

A Bench led by Chief Justice Uday Umesh Lalit and justices J.K. Maheshwari and Hima Kohli while recalling its September 29 order directed the Registry to list the review petition "by normal mode i.e., through circulation" on October 19.

In its short order, the judges stated that it had on September 29 directed the listing of the review petition in open court. "However, on minute perusal of the contents of the application seeking open court hearing, we do not deem it appropriate to list the review petition in open court and we are of the view that the same should be listed by way of circulation," it said while rejecting the Sebi's application for an open court hearing.

So far, Sebi has not shared the three documents — the two legal opinions by former SC judge BN Srikrishna and the former ICAI president YH Malegam's report which examined the irregularities — that the SC had asked it to share "forthwith", thus prompting RIL to file a contempt petition.

statement that its update across all 5G devices will be completed by mid-November, Apple said that it will start rolling out software upgrades to its iPhone users in December.

"We are working with our carrier partners in India to bring the best 5G experience to iPhone users as soon as network validation and testing for quality and performance are completed. 5G will be enabled via a software update and will start rolling out to iPhone users in December," Apple said in a statement.

"We are working closely with our operator partners and are committed to rolling out OTA updates across all our 5G devices by mid-November 2022, enabling Indian consumers to experience 5G seamlessly," a Samsung India

spokesperson said.

Most other Android device makers have started rolling out the software upgrades and are expected to fully meet the November 15 deadline.

The telecom operators, on their part, said that they are rolling out services in a phased manner and will continue to do once the handset makers upgrade the software on their devices, customer experience will be seamless in parts where services are being rolled out.

Subscribers of Bharti Airtel can now check on the Airtel Thanks app, whether 5G services are available in their area. Through the app, subscribers will also be able to check whether their phones are 5G enabled or not, and if enabled whether it has the upgraded software to support 5G services.

PepsiCo posts double-digit volume growth in India

FE BUREAU
New Delhi, October 12

GLOBAL FOOD AND beverages major PepsiCo on Wednesday reported good double-digit volume growth in India for the quarter that ended September 30, amid higher commodity prices and rising operating costs.

The company's revenue during the quarter was up 3.66% year-on-year to \$1.72 billion from the Africa, Middle East (West Asia) and South Asia (AMESA) region which includes India. This is "primarily reflecting effective net pricing, partially offset by a net decline in organic volume. Unfavourable foreign exchange reduced net revenue growth by 14 percentage points," the company said in

its earnings statement.

PepsiCo reported a mid-single-digit growth in the convenience foods unit volume in the Indian market, said the statement. The company's convenience foods unit volume in AMESA grew 5% reflecting double-digit growth in the Middle East, India and Pakistan on a year-to-date basis.

The operating profit

declined 14%, reflecting a 62-percentage points impact of higher commodity costs, primarily grains and packaging materials, certain operating cost increases and higher advertising and marketing expenses, the company said.

In the AMESA zone, PepsiCo convenient foods unit volume declined 2%, primarily reflecting a high-single-digit decline in South Africa, partially offset by double-digit growth in the Middle East and Pakistan and mid-single-digit growth in India.

Its beverage unit volume grew 11%, similar to the double-digit growth in India, the company said. The beverage unit volume grew 17%, primarily mirroring double-digit growth in India during the same period.

Jio unit gets satellite communication licence from DoT

JATIN GROVER
New Delhi, October 12

JIO SATELLITE COMMUNICATIONS, a unit of telecom operator Reliance Jio, has got a licence from the Department of Telecommunications (DoT) to offer satellite-based communication services in the country. The company received the Global Mobile Personal Communication by Satellite (GMPCS) licence on Tuesday, according to people aware of the matter.

With this, Jio Satellite has become the second company after Bharti Group-backed OneWeb to get a GMPCS licence from the government. AGMPCS licence is issued by the government for 20 years, which allows companies to offer satellite communication services in licensed service areas.

Jio Satellite was expected to comply with the licence requirements and sign the agreement within this week, basis which it was to be given the licence to operate satellite communication services in the country, FE reported on Tuesday.

In February, Reliance Jio's parent Jio Platforms formed a joint venture with Luxembourg-based satellite communication services provider SES to offer high-speed satellite-based broadband services.

Apart from OneWeb and Jio Satellites, other players such as Elon Musk's SpaceX-owned Starlink are also seeing a huge business opportunity to offer satellite-based internet services. One of the reasons for the growing interest in the satellite broadband segment is the opportunity to provide internet services to far-flung

and hilly areas without the need for fibre-based connectivity. It is also the only medium through which communication can be established in disaster zones when normal communication gets affected.

"We are getting interested from other private players as well to get satcom licence and more clarity on that would come in going forward," a senior DoT official said, adding that Amazon's Project Kuiper has not shown any interest to offer services in the country as of now.

The satellite communication sector is currently at a nascent stage in India, and with requirements of higher bandwidth, lower latency requirement of data and demand for such services in defence and military sectors, the segment is expected to see strong growth.

According to a report by the Indian Space Association (ISPA) and EY, the Indian space sector is expected to grow to \$13 billion by 2025, and of that satellite services and applications segment is likely to contribute the largest 36% share.

The satellite internet service providers are expected to start the services from next year as currently, the government is yet to allocate spectrum in the 27.5-28.5 MHz band for satellite services.

NSDL acquires 5.6% stake in ONDC for ₹10 crore

LEADING DEPOSITORY NSDL on Wednesday said it has acquired a 5.6% stake in the Union government's Open Network for Digital Commerce for ₹10 crore.

National Securities Depository Limited (NSDL) invested an amount of ₹10 crore in ONDC under the private place-

ment route, the depository said in a statement.

"This strategic deal will further strengthen the digital ecosystem to take digital e-commerce to the people of India," Padmaja Chunduru, MD and CEO at NSDL, said.

ONDC is an initiative of the commerce ministry. —PTI
