Wipro base)))™ harmony: Transition management and process knowledge capture

Business interactions spanning people, process, data, and systems in an organization need to be managed efficiently. In this hyper-competitive environment, a shift in any of these aspects can disrupt the entire spectrum and affect the organization. Wipro base)))™ harmony helps customers manage their business interactions and leverage best practices across industries.

Enable process harmonization

Simplify complex process capture, standardize and improve processes.

Knowledge capture, process design, and mapping

Project management module

Process transformation and harmonization

Wipro base)))™ harmony features

Project management module

Interactive process modeler

Enriched library of process templates across domains

Business interactions - predefined process

Wipro base)))™ harmony benefits

Reduction of manual effort through automatic process analysis to identify improvement opportunities

Reduction in cost of training as processes can be defined at the execution level along with screen captures and videos

Elimination of documentation effort through automatic generation of process documents (SOPs, FMEA etc.)

Comparison of multiple variants of the same process to help eliminate unnecessary variations

Capture implicit knowledge by using codified domain expertise

Reduction in change management effort involving people, process, data, and systems
